Next	Django		
Nuxt			

Hegy Febrianto

Front End Integration Developer Lead

Work Experience

Front End Integration Developer Lead

2020 – now | Bank Mandiri (Permanent)

- Led the development of Livin Beyond Super Apps, contributing to 47T IDR revenue, the highest-performing source in 2023.
- Contributing to the Development of a New Branch Delivery System and Business User platform B2B (Kopra By Mandiri).
- Acquired back-to-back tier 1 KPI on Mandiri in 3 years in a row.
- Develop many projects such as Livin, Kopra, New Branch Delivery System, and Back Office Dashboard to Maintain our product/data/promo/patching/feature on & off in Livin 2.0 with every branch in Indonesian.
- Maintained code quality using Sonar, unit tests, and robust query optimization to pass performance and penetration tests.
- Increased application performance by implementing state management, lazy loading, and event emitter concepts, reducing runtime across key platforms.
- Expand on mentoring, team management, and cross-functional collaboration.
- Collaborated with back-end and core banking systems to ensure seamless integration with third-party services.
- Conducted code reviews and mentored team members, ensuring adherence to best practices.
- Collaborated with BackEnd teams to divide microservices into two categories core & complementary.
- Definition: Core microservices are central to the primary business functionality and value proposition of your application. They handle essential tasks and processes that are critical to the system's main objectives.
